

BookWhereTM

The Definitive
Z39.50
Search Software

Looking Beyond...

BookWhere Windows Client

Overview:

BookWhere Windows Client is our flagship product.

BookWhere allows users to simultaneously search thousands of bibliographic and media databases. Users also have the ability to export retrieved records in a wide variety of formats.

"Highly recommended for all libraries and personal collections of serious researchers" - Library Journal

Features:

- A single interface to global resources
- Basic or advanced searching worldwide
- Access to thousands of databases worldwide
- AutoSync feature automatically updates the list of databases against WebClarity Software Inc.'s master list of databases
- Sorts and analyzes results to help you find exactly what you are looking for
- Export records in a wide variety of formats including MARC21 and the most popular citation management packages
- Multi-Language User interface (English, French, Spanish, Italian and German)

BookWhere Windows Interface

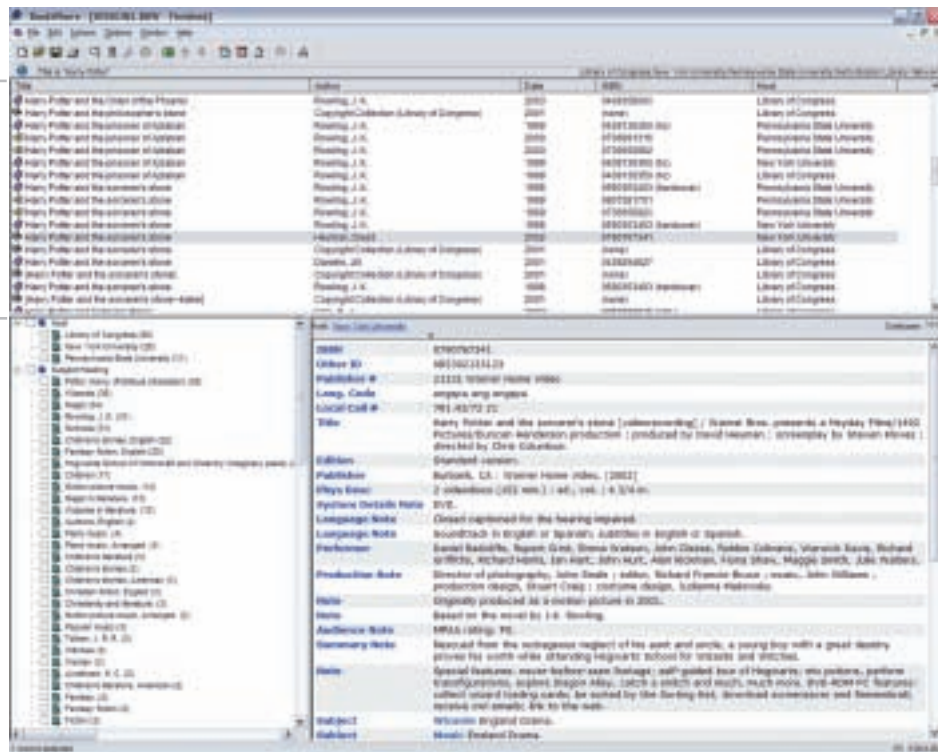

One simple interface to learn

The Record List

The results of your search are summarized here. Icons indicate the type of material. Entries can be sorted by any field.

The Analysis View

Information is pulled from each record. You can then limit your display to records from specific hosts, subjects, or other fields you want to use.

The Full Record Display

Easy to read labeled display or toggle to a full MARC display. Terms you searched for are highlighted.

Authors and subjects are "hyperlinked". Clicking on these terms causes BookWhere to issue a new search against the selected databases.

The host name is hyperlinked to the sites' Web Page.

BookWhere Online

Overview:

New BookWhere Online optimizes your library's Cataloguing and Research capabilities. Instantly search and retrieve bibliographic records through your web browser! BookWhere Online is a subscription service that allows users to search thousands of bibliographic and media Z39.50 databases from around the world.

Users can simply search and export records to different formats, including MARC21.

Features:

- No software to install*
- No firewall complications
- Easy to use
- Platform independent
- Perform broadcast searches to multiple databases simultaneously
- Databases are automatically updated every time you log in
- Export records in a wide variety of international formats including MARC21 and popular citation formats via file download or via e-mail

*If compliant web browser is installed on system. See chart on back page for a list of supported web browsers.

The BookWhere Online Interface

Simple to use. The interface is HTML 4.0 / JavaScript 1.1 compliant, so any modern web browser can work with BookWhere Online.

The Record List

The results of your search are summarized here. Icons indicate the type of material. Items are hyper linked to their full contents. Record list can be sorted in ascending & descending order.
